

PRECLINICAL SERVICES

IMVS Preclinical Services has conducted preclinical safety and efficacy testing since 2002. We offer a range of specialist preclinical services for biotechnology and pharmaceutical companies wishing to establish the safety or efficacy of their investigational new drugs and devices in preparation for regulatory submission. IMVS Preclinical Services are undertaken by the IMVS Veterinary Services Division.

Services include:

- Product safety and efficacy testing
- Acute and chronic toxicity studies
- Range finding studies
- Repeat dose studies
- Pharmacokinetic studies
- Specialist pathology services
- Analytical chemistry services
- Toxicokinetic analyses
- Consulting services
- Animals models
- Range of laboratory animals, both large and small
- Animal Imaging and Surgical facilities

As part of our service, we offer a wide range of analyses through our NCS ISO 9001 certified and NATA AS 4633 accredited laboratories. A full range of haematological, biochemical and histological analyses are available. The extensive experience of our staff in preclinical research, veterinary, pathology and service related activities ensures a high level of quality in all aspects of our services.

IMVS Preclinical Services collaborates with the Centre for Pharmaceutical Research at the University of South Australia to maximise the range of preclinical services offered to our clients.

IMVS Preclinical Services is a member of Adelaide Integrated BioScience Laboratories (AIB Labs), supported by BioInnovation SA.
